Student Name: _____

Lesson	Problems assigned	Due Date	Time needed to complete	Completed – Student's initials	Corrected – Parent's initials	Problems to review in class	Verified by Tutor

1. Fold paper lengthwise, working down the left side only. (You may also use the back.) Work **must** be complete and in pencil. Initial this form when you have completed the homework.
2. Present your homework to a parent *with plenty of time* to have it graded and for you to complete your corrections. Have a parent mark incorrect problems in red.
3. Rework wrong problems, on your own, in red ink on the right side of the paper, beside the incorrect problem.
4. Check your corrections with the solutions manual, and make final corrections in blue or black ink.
5. Have your parents initial that they have checked your homework and that you have made all corrections. Be sure to list the problems on this form that you still don't understand and that you would like to see worked out in class.

In order to receive full credit (100%) for your completed assignments (100%), you **must** complete your work as stated, and it **must** be accompanied by this signed grade sheet. If your assignments are not checked and corrected by the due date, they are late assignments. Late work will be accepted at the next meeting date **only** (unless you have an excused absence) and will receive 60% credit-- **only** if it is complete with corrections.
